

### Outcomes

Through a combination of targeted training and experience, an individual with the mobile crane will be able to:

<b>Roles and responsibilities</b>	<ul style="list-style-type: none"> <li>Describe the nature of the sector of industry and their role and responsibilities as a plant operator</li> </ul>
<b>Preparing for work</b>	<ul style="list-style-type: none"> <li>Name and explain the purpose of principal components, the basic construction, controls and terminology</li> <li>Conform with manufacturer's requirements as per the operator's handbook, other types of information source and relevant regulations and legislation</li> <li>Explain all relevant documentation</li> <li>Undertake all pre-use checks</li> </ul>
<b>Travelling and manoeuvring</b>	<ul style="list-style-type: none"> <li>Configure and set for travel (site and highway)</li> <li>Travel the crane to an area of work</li> <li>Manoeuvre in confined spaces</li> </ul>
<b>Setting up for work</b>	<ul style="list-style-type: none"> <li>Configure the crane for lifting duties</li> <li>Deploy outriggers to specification (where applicable)</li> <li>Explain action required for hazards, underground and overhead services</li> </ul>
<b>Working tasks</b>	<ul style="list-style-type: none"> <li>Programme / set-up Rated Capacity Indicators for lifting duties</li> <li>Lift various loads using the full radius and slewing capabilities of a crane</li> <li>Accurately place loads</li> <li>Change falls of rope on a hook block</li> <li>Minimise the swinging of loads</li> <li>Move loads through machine travel (where applicable)</li> <li>Maintain safe working situations</li> <li>Comply with signals and instructions</li> <li>Explain rigging and de-rigging procedures when fitting fly jibs or boom extensions</li> </ul>
<b>Completing work</b>	<ul style="list-style-type: none"> <li>Dismantle the crane in preparation of movement</li> </ul>
<b>Shutting down</b>	<ul style="list-style-type: none"> <li>Carry out shut down and securing procedures</li> </ul>

### Syllabus

Learning outcome	Training content	
<ul style="list-style-type: none"> <li>Describe the nature of the sector of industry and their role and responsibilities as a plant operator</li> </ul>	<ul style="list-style-type: none"> <li>Industry type</li> <li>Customer / client needs</li> <li>Sector contribution</li> <li>Role</li> <li>Reporting structures</li> <li>Lifelong skills</li> <li>Working practices</li> <li>Social responsibilities</li> </ul>	<ul style="list-style-type: none"> <li>Communication with colleagues / management / other trades</li> <li>Health and Safety at Work Act</li> <li>Environmental issues</li> <li>Other trades</li> </ul>
<ul style="list-style-type: none"> <li>Name and explain the purpose of principal components, the basic construction, controls and terminology</li> </ul>	<ul style="list-style-type: none"> <li>Differing types</li> <li>Functions and applications</li> <li>Power units</li> <li>Hydraulic systems</li> <li>Counterweights</li> <li>Chassis / steering / tyres</li> </ul>	<ul style="list-style-type: none"> <li>Stability</li> <li>Booms / jibs</li> <li>Hoisting gear / ropes</li> <li>Safety systems</li> <li>Slewing arrangements</li> <li>Attachments</li> </ul>
<ul style="list-style-type: none"> <li>Conform with manufacturer's requirements as per the operator's handbook, other types of information source and relevant regulations and legislation</li> </ul>	<ul style="list-style-type: none"> <li>Operator's Manual</li> <li>Duties charts</li> <li>Ground loading charts</li> <li>Machine decals</li> <li>Health and Safety at Work Act</li> <li>PPE</li> <li>Codes of Practice</li> <li>Site plans / drawings</li> </ul>	<ul style="list-style-type: none"> <li>Lifting requirements and limitations</li> <li>Method statements</li> <li>Risk assessments / COSHH</li> <li>Inspection and reporting forms / procedures</li> <li>Lift plans</li> </ul>
<ul style="list-style-type: none"> <li>Explain all relevant documentation</li> </ul>	<ul style="list-style-type: none"> <li>Test certificates</li> </ul>	<ul style="list-style-type: none"> <li>Thorough examination certificates</li> </ul>
<ul style="list-style-type: none"> <li>Undertake all pre-use checks</li> </ul>	<ul style="list-style-type: none"> <li>Regular and non-scheduled maintenance procedures</li> </ul>	<ul style="list-style-type: none"> <li>Sequence of pre-use checks</li> <li>Defect reporting</li> </ul>
<ul style="list-style-type: none"> <li>Configure and set for travel (site and highway)</li> </ul>	<ul style="list-style-type: none"> <li>Driving controls</li> <li>Attachments</li> <li>Security</li> </ul>	<ul style="list-style-type: none"> <li>Driving position</li> <li>Visibility</li> <li>Road Traffic Act</li> </ul>
<ul style="list-style-type: none"> <li>Travel the crane to an area of work</li> </ul>	<ul style="list-style-type: none"> <li>Driving controls</li> <li>Ground conditions</li> <li>Traction</li> <li>Axle loadings</li> <li>Hazards</li> </ul>	<ul style="list-style-type: none"> <li>Working area</li> <li>Site route</li> <li>Environment protection / minimise damage</li> <li>Road travel</li> </ul>

**Note:** The listed training content should not be considered exhaustive and subjects may be added to reflect the individuals' working environment.

# Mobile Crane- A60

## Learning for CPCS

### Safety critical

Emphasis to be placed on the following topics:

Topic	Emphasis
<ul style="list-style-type: none"> <li>Lift plans / method statements</li> </ul>	<ul style="list-style-type: none"> <li>Lift plan types and requirements and the need for lift planning.</li> <li>Adherence to the lift plan as constructed by a competent person</li> </ul>
<ul style="list-style-type: none"> <li>Fitting and removing fly jibs and jib extensions</li> </ul>	<ul style="list-style-type: none"> <li>Specific training and strong adherence to the specific manufacturer's procedures</li> </ul>

### Duration / Ratios

To allow effective learning, these training times are recommended for this category. Candidates must be profiled to establish learning needs. Durations should be of a length to ensure the learning outcomes are met.

Experience	Accumulated hours
<ul style="list-style-type: none"> <li>Novice operators with no industry or machine experience</li> </ul>	70
<ul style="list-style-type: none"> <li>Novice operators with industry experience but no machine experience</li> </ul>	62
<ul style="list-style-type: none"> <li>Operators with unrelated (lifting) machine experience</li> </ul>	42
<ul style="list-style-type: none"> <li>Operators with similar (lifting) machine experience</li> </ul>	28

All candidates must have received the equivalent to 7 hours of site safety and induction training

***To allow effective learning, the listed candidate / machine / instructor ratio is the maximum recommended for this category***

4 candidates : 2 machines: 1 instructor

### Resources

Practical equipment	Theory equipment
<ul style="list-style-type: none"> <li>• Mobile crane that meets current legislation</li> <li>• Operator’s manual for the machine(s)</li> <li>• Different types of loads</li> <li>• Lifting accessories</li> <li>• Sufficient area of ground suitable for placing loads at various heights and radius</li> </ul> <p><b>PLUS</b></p> <ul style="list-style-type: none"> <li>• Suitable PPE</li> <li>• Risk assessment for all areas where training is occurring</li> </ul>	<ul style="list-style-type: none"> <li>• PUWER 1998 Regulations</li> <li>• LOLER 1998 Regulations</li> <li>• HSE GS6</li> <li>• BS 7121 (parts 1, 2 and 3)</li> <li>• Operator’s Manual</li> </ul> <ul style="list-style-type: none"> <li>• Specifications for types of mobile crane</li> </ul> <p><b>PLUS</b></p> <ul style="list-style-type: none"> <li>• Suitable room for theory training purposes</li> <li>• Welfare and rest facilities during training</li> </ul>

### Category

#### Category description and types

CPCS defines a category as an item of plant or equipment used within the construction or allied industries and worked in accordance with the manufacturer’s basic design. Although this category can have varying uses within industry, for CPCS training and assessment standards, the descriptions reflect basic core use. Endorsements are sub-categories that reflect the variations for this category by duties. This category has three endorsements.

To identify a machine within this category, a typical mobile crane would normally have the listed features and be used within the described characteristics.

Category features	Category characteristics
<ul style="list-style-type: none"> <li>• Multi-axled chassis containing (in most cases) power, hydraulic and electrical units</li> <li>• 360 degree rotating upper structure containing the operating position and multi-sectioned boom, all hydraulically operated</li> <li>• Winch operated lifting metal-stranded hoist rope mounted on pulleys</li> <li>• Hook block suspended by hoist ropes and pulleys and the end of the boom</li> </ul>	<ul style="list-style-type: none"> <li>• Able to travel in forward and reverse and change direction during travel by steering the axles</li> <li>• All-axle steering</li> <li>• Travels on hard surfaces with some types having off-road capability</li> <li>• Lift loads by vertically raising the hook block</li> <li>• Moves and places loads by using a combination of slew and linear motions within the confines of the operating radius, depth and height</li> </ul>

## Endorsements

---

### Endorsement characteristics

---

- **Endorsement A:** Blocked duties only – minimum of four outriggers extended to carry out lifting
- **Endorsement B:** Pick-and-carry duties only – able to travel with a suspended load using forward to reverse direction
- **Endorsement C:** All duties – able to perform both duties of blocked and pick-and-carry
